

**SUMMIT MEDICAL EXPRESS**

**Are You Tired of UTI's?**

**D**o you wash and reuse catheters each and every day? Do you frequently suffer from UTI's? There may be a correlation between the two, with a solution readily available. While Medicare would prefer its beneficiaries to use the "clean technique" for intermittent catheterization, this just doesn't work for everyone. So, if you have had at least two UTI's within any 12 month period, you are entitled to "sterile technique" which gives you a new catheter each and every time you need

one. (Up to 6 per day) By using a sterile catheter each time, you reduce the chance of bacteria entering your body, a common problem with the "wash and reuse" method. Unfortunately, many people, and doctors as well are unaware that Medicare does allow sterile catheterization under these guidelines.

We at Summit Express Medical Supply are here to help you get on your way to a UTI free life. Give us a call and your days of wash, reuse and UTI may be over.

**THERAPY CENTER FOR CHILDREN**

**Early Intervention and More**

**T**he Therapy Center for Children, LLC founded in June 2006 has offices at 156 North Ocean Avenue located in Patchogue, New York. We are composed of pediatric occupational therapists, physical therapists, psychologists, speech therapist and special educators. Our caring professionals provide evaluations and services in multiple languages to children from birth to 21 years old and have training to provide interventions that include but are not limited to:

- Adaptive Equipment
- Bilateral Coordination
- Handwriting Without Tears
- Motor Planning
- Neuro-Developmental Treatment
- Parent Education
- Prompt Therapy
- Sensory Integration
- Tummy Time

Christina Bellini-Zaher is the owner and founder of The Therapy Center. She has been privileged to work directly with many of these exceptional providers and has great confidence in both their practical as well as interpersonal skills. All of The Therapy Center therapists are licensed, certified and all therapist certifications require criminal background checks.

The company is approved by

NYS Department of Health to provide Early Intervention Services and is pending approval to provide pre-school related services in Suffolk County. These services are free to qualifying children. Ages 0-3, which the early intervention program covers, can be especially rewarding as children and families reach developmental milestones, including the first time they are able to coordinate their hands to hold their bottle, maintain a crawling position, actively release an object from the palm of their hands, taking their first steps, and saying their first words. This training enables therapist insight into what goals and challenges children and their families may face as they move on into preschool and elementary school.

The Therapy Center for Children's philosophy is that by providing these early intervention services, we will assist children to attain their maximum level of independence. This will improve the quality of life of children and their families, and help them to actively participate in the meaningful and significant things that make their lives more purposeful.

Funding for early intervention services is through Suffolk County and the NYS Department of Health. Special
